

TAMPERTRONIK L

TAMPER EVIDENT LABELLING MACHINE

TAMPERTRONIK L is an automatic labelling system for pharmaceutical boxes.

It allows the application of two tamper evident labels on the opposite opening corners of the boxes.

Thanks to a couple of aligner belts, labelling is precise and accurate.

The adjustable guides help position the products, ensuring the correct alignment of the labels.

SPECIFICATIONS:

- Designed to work with different carton sizes, up to 200 x 200 x 200mm.
- Maximum label dimensions 40 x 40mm.
- Sensors for transparent labels.
- Power supply 230V / 50Hz / 16A.
- Maximum production speed up to 100 pieces/minute.

FUNCTIONALITIES:

- Automatic station for tamper evident labels application on pharmaceutical boxes.
- Precise and accurate labelling.
- Adjustable guides for products positioning.

OPTIONS:

- Couple of spacing belts to handle automatic loading from a production line.
- Control of label application including rejector and tray.
- Protection cover.
